SONDEX® Plate and shell heat exchanger (SPS)

Description

SONDEX® plate and shell heat exchangers (SPS) combine the strengths of both shell and tube heat exchangers and plate heat exchangers, retaining the high working pressure and temperatures of the former coupled with the high efficiency of the latter. A “best of both worlds” solution, our plate and shell heat exchangers provide unmatched performance for a wide range of applications, particularly vapor condensation duties.

Benefits:
- Very adaptable heat exchanger. An excellent choice for handling condensation duties, especially duties without condensate subcooling. They are also perfect steam heaters of clean fluids, demineralized water, and clean thermal oils.
- The heat exchanger is designed to be highly resistant to thermal shocks as well as thermal and pressure fatigue making it very well-suited for cyclic duties and other duties with sudden, large fluctuations in temperature.
- Available in both bolted and fully-welded designs. The fully-welded types can handle higher temperatures and pressure levels than the bolted types but cannot be opened for cleaning. This can instead be done with CIP (Cleaning in Place) systems.

Common industries:
- HVAC
- Power industry
- Heavy industry
- General industry
- Petrochemical industry
- Chemical industry

Typical processes:
- Condensation
- Steam heating
- Oil coolers
- Gas heaters/coolers

Main data:
- Min. temperature −10 °C (14 °F)
- Max. temperature
  - 250 °C (482 °F) - bolted version FL
  - 400 °C (752 °F) - fully-welded version FW
- Max. working pressure
  - 25 bar (360 psi) - bolted version FL
  - 40 bar (580 psi) - fully-welded version FW
- Clean fluids, steam, vapors, gases
- Connections from DN25 to DN300 (1” to 12”)

Approvals:
- Please contact your local Danfoss/Sondex sales representative to provide you with the exact approvals available on your region

Pressure vessel code:
- EN13445 (PED 2014/68/EU)
- ASME sec VIII, Div. 1
- Other standards available on request
### Naming of units

**SPS179-FW16DN200100-90-TL**

- **TL** - Plate grouping
- **90** - Number of plates in heat exchanger
- **DN200100** - Port diameter. 200 - shell side, 100 - plate side (mm)
- **16** - Design pressure of heat exchanger (bar)
- **FW** - Shell type
- **179** - Type of heat exchanger based on plate size
- **SPS** - SONDEX® plate and shell heat exchanger

1) **Shell types description:**

There are two shell types which can be offered for different applications and duties.

- **FW** – Fully-welded version,
- **FL** – Bolted version with removable plate pack

### Heat exchanger design

SONDEX® plate and shell heat exchangers (SPS) are available in bolted versions - FL (on the left) with removable plate pack and fully-welded versions - FW (on the right)

*A SONDEX® plate and shell heat exchanger (SPS) consist of*

1. Removable core (cover + plate pack) - only for bolted FL version
2. Shell
3. Plate side connections
4. Shell body flange (only for bolted version FL)
5. Plate pack
6. Shell side connections
7. Bolts+nuts (only for bolted version FL)
8. Mounting bracket
For higher thermal requirements, the SONDEX® plate and shell heat exchanger can be designed as a multi-pass solution.

Connections

Connections can be provided according to all known standards. Positioning of the inlet and outlet connections will be specified during the construction phase based on application and duty.

Please contact your local Danfoss or Sondex sales representative to provide you with the design for SONDEX® plate and shell heat exchangers.

Using the right plate for each individual duty is very important, as it greatly impacts the efficiency of the entire installation. It is important that the area of the plates and the type of pattern match the requirements of individual thermal duty. We have developed a wide plate portfolio to provide the perfect plate and connection size for any duty. No application is too small or too big for us - we provide the optimal technical solution every time.

Our extensive SONDEX® plate portfolio includes plates that lie outside the commonly manufactured plate sizes to cover all thermal duties optimally.

Accessories

**Insulation**
The insulation jacket for SONDEX® plate and shell heat exchangers is used in different applications with high temperatures and cooling systems.

**Floor mounting bracket**
Connection to frame mounting flange.

**Spare parts**
Spare parts for SONDEX® plate and shell heat exchangers, such as plate pack, gaskets, frame parts can be ordered for maintenance, repair, etc.
Please contact your local Danfoss or Sondex sales representative to provide you with information on spare parts available for SONDEX® plate and shell heat exchangers.

Selection and ordering

Please contact your local SONDEX® or Danfoss sales representative for the selection and / or ordering of the heat exchangers, spare parts, and accessories.

For contact information please visit https://www.danfoss.com/en/contact-us.
For the exact dimensions of SONDEX® plate and shell heat exchangers (SPS) please contact your local Danfoss or Sondex sales representative.
